### Introduction to Android Studio and xcode

Objective : The objective of this lab session is to get familiar with Android Studio and xcode. As an introduction you will develop a simple application to add two numbers for both the platforms (Android and iPhone).

We will provide you with a demo and and guide you through the steps involved in producing a basic app. Follow the below provided links to install these platforms on your personal systems.

Installing and Configuring Android Studio on your systems : <https://developer.android.com/studio/install.html>

Installing xcode on your systems : <https://developer.apple.com/xcode/>

The image shows a screenshot of a web application interface. At the top, there is a blue header bar. Below it, the word "Result" is centered. There are two input fields, each with a placeholder text "Enter first number" and "Enter second number" respectively. Below the input fields is a grey button labeled "ADD". At the bottom, there is a footer with the text "EDA 2018" centered.
